

Security is a wide topic

- ✓ CSCD27 Computer and Network Security covers
 - Cryptography
 - Network security
 - System security
 - Web security

(recap) Protection

File systems implement a protection system

- Who can access a file
 - How they can access it
- ➔ A protection system dictates whether a given action performed by a given subject on a given object should be allowed
- You can read and/or write your files, but others cannot
 - You can read `/etc/motd`, but you cannot write it
