Why do we need operating systems?

Why learning about operating systems

- An exciting time for building operating systems
 New hardware, smart devices, self-driving cars, data centers, etc.
 Facing OS issues in performance, battery life, security, isolation
- Pervasive principles for systems in general Caching, concurrency, memory management, I/O, protection
- Understand what you use
 System software tends to be mysterious
 Understanding OS makes you a more effective programmer
- Complex software systems
 Many of you will go on to work on large software projects
 OSes serve as examples of an evolution of complex systems
