Journaling Modes

Journaling has cost - one write = two disk writes (two seeks with hard disks)

- → Several journaling modes balance consistency and performance
- · Data journalling journal all writes, including file data
 - expensive to journal data
- Metadata journaling journal only metadata
 Used by most FS (IBM JFS, SGI XFS, NTFS)
 - file may contain garbage data
 - Ordered mode write file data to real FS first, then journal metadata Default mode for ext3
 - old file may contain new data
