First Fit

➡ Pick the first block that fits

Data structure
free list, sorted LIFO, FIFO, or by address

Code
scan list, take the first one

Best Fit vs First Fit

Suppose memory has two free blocks (size 20 and 15)

- Workload 1 : `alloc(10), alloc(20)`

- Workload 2 : `alloc(8), alloc(12), alloc(12)`
