Linux Paging

➡ Global replacement (like most Unix)

• Modified second-chance clock algorithm

• Pages age with each pass of the clock hand

• Pages that are not used for a long time will eventually have a value of zero

Acknowledgments

Some of the course materials and projects are from

- Ryan Huang - teaching CS 318 at *John Hopkins University*

- David Mazière - teaching CS 140 at *Stanford*

- Sina Meraji - teaching CS 369 at *University of Toronto*
