You can work in a group …

…but it is not a team project !

◉ There is no isolated tasks that can be assigned to different individuals

➡ All individuals must design and implement the whole solution to fully grasp the underlying concepts (that are in the details)

✓ Work alone first, confront your solution and come up with the best one

[disclaimer] Working as a group

- Each individual is responsible to make the whole project work

- Each individual is responsible for the work submitted as a team
